

Ideation Phase

WEB PHISHING DETECTION

Date	19 September 2022
Team ID	PNT2022TMID46206
Project Name	Web phishing detection
Maximum Marks	4 Marks

IDEATION PHASE:

Web service is one of the key communications software services for the Internet. web phishing is one of many security threats to web services on the Internet. web phishing aims to steal private information, such as usernames, passwords, and credit card details, by way of impersonating a legitimate entity. It will lead to information disclosure and property damage. This paper mainly focuses on applying a deep learning framework to detect phishing websites. This paper first design two types of features for web phishing: original features. A detection model based on deep belief networks (DBN) is then presented.
